

## SoliderSound Releases the S Pulser Pro

SoliderSound has released their new envelope sequencer audio plugin, S Pulser Pro, which is an advanced version of their S Pulser Free plug-in. The S Pulser Pro can generate simple or complex rhythm and pulse effects on any kind of sound with ease. Its goal is to offer countless inventive ways for manipulating sounds, thus producing distinctive and innovative rhythms and melodies, with little effort for the users.

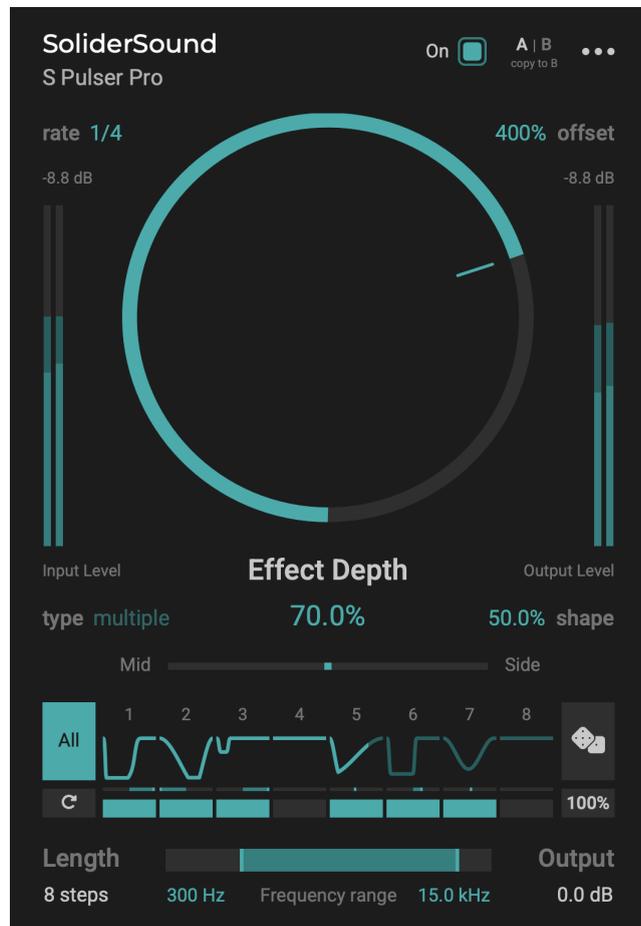

The S Pulser Pro is equipped with several practical features, each capable of influencing the type of rhythmic sound the user is pursuing. It allows auto-generating sequences and making complex rhythms with just a single click. This helps the user explore endless variations of their sound, transforming them into different rhythms and styles effortlessly.

Furthermore, users can specify to the plugin what aspects to modify and what to leave unchanged while it auto-generates for them.

The user interface is clean, minimalistic, and easy to understand. The plugin is CPU-optimised and supports high-end retina displays. The plug-in also comes with several built-in presets.
